

Daniel Valero

Full Stack Web Developer | Angular | Laravel | Node.js

I am a full stack developer with experience developing web applications using a variety of technologies. I have strong experience with front-end development, specifically in Angular, React, and JavaScript. Furthermore, I also have extensive experience in back-end development, especially in Node.js and Laravel.

PERSONAL PROJECTS

Inmovally (02/2023 - 05/2023)

- I completed this project using React and Bootstrap. This project involved building a web page with a modern design, robust navigation, and a user-friendly interface. I am very proud of the work I did on this project. I used the latest technologies to create a modern website with a user-friendly interface.

BM (12/2022 - 01/2023)

- I completed a web page using the Angular and Laravel frameworks. This project was a great opportunity to develop my skills in both frameworks and take advantage of their powerful features.
